ZAIDAN IKHSAN GUMILAR

FULL STACK DEVELOPER | SOFTWARE & BUSINESS SYSTEMS

Sumedang, Indonesia • 0821 1617 9745 • zaidanikhsan.g@gmail.com
LinkedIn: linkedin.com/in/zaidan-ikhsan-gumilar-8a33aa252 • Portfolio: zig-porto.vercel.app

PROFILE

Full Stack Developer and project lead with experience building web applications, business management systems, and cloud deployments. Combines frontend and backend development with system design, infrastructure, and practical understanding of user and operational needs.

EXPERIENCE

Full Stack Developer / Project Manager | Artefact Tech

Sep 2025 - Present

- Coordinate web projects, shape application architecture, design UI/UX in Figma, and contribute across frontend and backend development.
- Support team coordination and delivery from requirements through implementation.

Full Stack Developer | Sahinaja

Project-based - sahinaja.com

- Developing a wedding invitation and services platform designed to support wedding-related businesses and their customers.

Full Stack Developer | KIM Rancakalong

Project-based - kimrancakalong.com

- Building a community information platform for local information, village initiatives, and UMKM opportunities.

IT Manager | PT Kencana Lima Delapan

Jan 2026 - Apr 2026

- Built and coordinated POS across 9 business units, reservation flow supporting up to 1,000 customers, attendance for 150 employees, and inventory systems for 12 business units.
- Managed field network and operational IT infrastructure.

Junior DevOps Intern | PT Sawala

Feb 2024 - Jul 2024

- Managed servers and deployments, maintained websites, and implemented CI/CD pipelines using GitHub Actions.

SELECTED PROJECTS

School Management System (in development)
Building a school platform with role-based access for Super Admin, Teacher, and Student, plus class-based access to relevant information and learning content. Source: github.com/ZaidanIg/dashboard-school-management

Recycly — IoT Recycling System
Led a team project using a reward-based recycling concept; developed cloud/application architecture and a prototype collector using ESP32 and ESP32-CAM. Project work included Node.js APIs and database design.

EDUCATION

Bachelor of Information Technology

Universitas Sebelas April
Nov 2021 – Aug 2025
GPA: 3.49 / 4.00
